

JAYSON L. BALDOVINO

JUNIOR DEVELOPER

Parañaque City, Philippines | 096-9499-2552 | jysnbldvn@gmail.com | www.linkedin.com/in/jysnbldvn | <https://github.com/jysnbldvn01>

PROFESSIONAL SUMMARY

IT graduate and junior developer with hands-on experience across React.js, Node/Express, PHP, and SQL/NoSQL databases, built through real end-to-end projects including enrollment systems, scheduling platforms, and record management tools. Comfortable working directly with clients and adapting quickly across different tech stacks.

PROFESSIONAL EXPERIENCE

IT On-Site Support (OSS) Intern – Technology Services (TS) MARCH 25 - JUNE 15, 2026

KMC Solutions

- Resolved hardware, software, and basic network issues, minimizing disruptions to daily operations.
- Configured and deployed laptops, desktops, and IT equipment, ensuring devices were ready for users.
- Performed WiFi, printer, peripheral, and system access troubleshooting, improving workplace IT reliability.
- Supported meetings, events, and equipment requests, ensuring smooth technical operations.

Freelance Web Developer & Computer Technician 2026 - PRESENT

Parañaque City

- Developed customized web applications and digital systems, delivering solutions based on client requirements.
- Implemented frontend, backend, database, and API components, creating functional and integrated applications.
- Diagnosed hardware, software, and Windows issues, restoring systems to working condition.
- Collaborated with clients throughout development, ensuring requirements were understood and solutions met their needs.

EDUCATION

Bachelor of Science in Information Technology

- Eulogio “Amang” Rodriguez Institute of Science and Technology (S.Y. 2022-2026) Nagtahan, Sampaloc Manila.

PROJECTS

NearZeroDowntime AI Audit System (nearzerodowntime.com) 2026

Co-Developer | TSX (TypeScript React), Supabase PostgreSQL, Lovable AI

- Collaborated on the full-stack architecture, assisting in deploying a TSX frontend integrated with a Supabase PostgreSQL backend via Lovable AI
- Developed an AI-driven auditing engine that automatically evaluates infrastructure data against ISO 27001, NIST, ITIL, and FinOps frameworks.
- Built an automated reporting dashboard that delivers real-time infrastructure visibility and boardroom-ready strategic insights to the executive team.

Medes Voice and Arts Academy (MVAA) 2026

Lead Full-Stack Developer | TSX (TypeScript React), PHP, Supabase (PostgREST REST API), PostgreSQL

- Engineered the full-stack architecture using a React.js frontend and a custom PHP backend.

- Developed a centralized master calendar to synchronize instructor availability, classes, and appointments.
- Built a dynamic online enrollment module to securely capture student registration data and schedules.
- Designed an end-to-end support ticketing dashboard and secure, role-based admin panels.

PeerFusion Skill Share Platform (peerfusionskillshare.com) 2025

Lead Full-Stack Developer | React.js, Node/Express.js, RestfulAPI, AWS RDS/Firebase

- Led the development of a web-based peer-to-peer skill-sharing platform for students.
- Designed and implemented front-end and back-end components.
- Developed features for user interaction, skill sharing, and platform management.
- Integrated databases and APIs to support application functionality.

Barangay Management System (Barangay 570 & Bagong Tanyag) 2024-2025

Co-Developer | HTML5, Python, XAMPP MariaDB

- Built a resident search feature that auto-generates Barangay Clearances and other government certificates on demand.
- Developed a centralized digital record system, replacing manual paperwork for resident documentation.
- Improved record-processing speed and accessibility for barangay staff.

DailyCal Application 2025

Co-Developer | Android Studio, Kotlin, LiteDB, NoSQL

- Engineered a native Android application in Kotlin for productivity and real-time calorie tracking.
- Integrated LiteDB as an embedded NoSQL store for lightweight, local data management.
- Programmed interactive UI components and managed real-time data tracking pipelines.

IoT Air Humidifier Detector 2024

Technical Leader | Arduino Uno, C++

- Led the development of an Arduino Uno-based IoT system using environmental sensors.
- Integrated hardware and software components for environmental monitoring and automated humidifier control.

School Enrollment Web System (EARIST) 2024

Lead Developer | React.js (Vite), Node/Express.js, XAMPP MySQL

- Developed the backend using Node/Express.js and MySQL.
- Implemented HTTP request and response handling between frontend and backend.
- Managed multiple database entities for enrollment data processing.
- Integrated frontend and backend components to support proper data flow.

SKILLS

- **Programming & Development:** TypeScript (TSX), Python, JavaScript (ES6+), React.js, Vite, Node.js, PHP, Django, HTML5, CSS3
- **Backend & APIs:** RESTful API Development, Express.js, PostgREST API, HTTP Request/Response Handling
- **Databases & Cloud:** Supabase, PostgreSQL, MySQL, MongoDB, AWS RDS, XAMPP
- **Tools & Practices:** Git, GitHub, Docker, AI-Assisted Development
- **IT Support & Maintenance:** Hardware & Software Troubleshooting, Windows OS Maintenance

CERTIFICATION

- 3rd PHYIGF Tech Horizon: Bridging Digital Today to Tomorrow **2024**
- Understanding Database Management System as a Tool For Effective Data Organization and Information Handling **2025**
- IN2ITion 2025: Shaping Minds, Shaping The Nation, Ignition Action **2025**
- theAsia Pacific Youth Internet Governance Forum (yGIF) **2025**
